

CAD Drafters

Growing Houston Area engineering and construction company is looking to fill multiple drafting positions. Drafters will use CAD drafting techniques to convert engineering field sketches into structural steel design drawings for customer approval. After customer approval, IFC and Shop drawings will be created using the same techniques.

An Associates Degree in a drafting discipline is preferred but overall AutoCAD experience will be taken into account. Extensive knowledge of AutoCAD 2005, and overall computer literacy are required for this opportunity. Successful candidates will demonstrate strong communication skills and an above average ability to work in a fast-paced team environment with multiple deadlines.

We offer comprehensive compensation plan including; competitive salary, medical benefits, 401K and vacation time. We are looking for individuals with the skills and ambition to take their work to the next level as a key part of a growing company. Please reply with resume, salary history and requirements to jobs@fall-arrest.com.
