

H-60 PHASE STYLE MAINTENANCE PLATFORM

Designed with direct input from H-60 service technicians, The H-60 Phase Style Maintenance Platform features a compact footprint and high strength, lightweight aluminum construction. The FLS H-60 platform offers full fall protection and enhanced worker safety without obstructing the maintenance process and conforms to, meets and exceeds OSHA requirements. As with all FLS Phase Style Platforms, the H-60 platform is easily mobile when necessary and securely locked in place during maintenance procedures.

U-60 PHASE STYLE MAINTENANCE PLATFORM

The U-60 Phase Maintenance Platform

provides a maintenance bay to facilitate complete fall protection to technicians servicing all areas of the aircraft. The platform is a totally OSHA compliant high strength, lightweight aluminum work platform with rugged, structural design.

This platform's load rating is confirmed using finite element analysis method. U-60 Phase Maintenance Platforms are designed for easy maneuverability and can be separated from the other components for hanger/facility replacement storage.

OSHA COMPLIANT

FLS Maintenance Stands are constructed from light weight, high-strength structural grade 6061 aluminum and self-draining, anti-slip and anti-bounce 5052 aluminum Safety Treads OSHA compliant, omnidirectional and self-correcting. All welded designs are in accordance with AWS D1.1 & D1.2. Each design features load ratings. FLS Stands provide complete OSHA compliance for fall protection during maintenance procedures.

WHY FLS?

Maximizing fall-safety requires proper setup and training. FLS provides full technical support and training upon delivery. One manager with total accountability handles your project. FLS Phase Style Platforms are the most cost and time efficient of any maintenance platforms on the market today. Piecemeal competitors can't compare with FLS' turnkey costs and services.

WARRANTY INFORMATION

FLS provides a three (3) year warranty on the total platform, as well as part listings for identification and ordering of replacement parts.

FEATURES

- **Quick Assembly** modular, easy assemble/disassemble platform decks feature bracing systems that allow for 1/3 less setup time
- **Versatility** the maintenance bay can be utilized as a wrap around bay or split between tail and main sections of the helicopter
- **Rugged Construction** each stand is constructed from light weight, high-strength aluminum and self-draining, anti-slip, anti-bounce safety tread
- **Mobility** all platforms have been engineered for easy transport and mobility

Sliders (Sliding Profiling Decking)

Easy, quick and safe locking sliders located around all points of the helicopter offer profile conformity, and are engineered for weight load stability

Each slider end is outfitted with heavy duty rubber bumpers to protect aircraft/land vehicle skin. Made of the same anti-slip, anti-bounce OSHA compliant tread plate. Each individual slider can be easily repositioned for more precise aircraft profile conformity

Hard mounted electrical and air line connections conveniently located on all main and tail deck sections. Electrical system incorporates emergency shut-off switch, GFI (Ground Fault Interrupter) and incorporates all UL approved components.
