

MODULAR MAINTENANCE STANDS

FLS Modular Maintenance Stands are designed to give fall protection access to all aircraft types for spot maintenance points. The flexible modules allow for easy portability, deployment and can be repositioned anywhere along the aircraft or land vehicle. The modules are also easily palletized for efficient transport. Modular Maintenance stands have a minimal footprint design required inside high density, space challenged hangars or outside on the flight line. This stand is designed for all types of commercial and military aircraft.

MODULAR MAINTENANCE STANDS

FLS Modular Maintenance Stands

The adjustable nature of modular stands, combined with quick-release latches, allows for easy deployment and unparalleled flexibility. Decks and staircases can be continually added into the stand configuration to alter and expand access to the aircraft as needed.

QUALITY ASSURANCE

Each stand is tested by quality assurance during the production of the stand with a final inspection by the FLS Quality Assurance Manager. On past contracts FLS has worked directly with a military designated Quality Assurance Representative from the National Defense prior to shipment. To ensure quality performance of the stand, an FLS qualified technician is sent to each installation site with the stand to set-up, test, final inspect and train staff on the uses of each feature.

OSHA COMPLIANT

FLS Maintenance Stands are constructed from light weight, high-strength structural grade 6061 aluminum and self-draining, anti-slip and anti-bounce 5052 aluminum Safety Treads OSHA compliant, omnidirectional and self-correcting. All welded designs are in accordance with AWS D1.1 & D1.2. Each design features load ratings. FLS Stands provide complete OSHA compliance for fall protection during maintenance procedures.

WHY FLS?

Maximizing fall-safety requires proper setup and training. FLS provides full technical support and training upon delivery. One manager with total accountability handles your project. Piecemeal competitors can't compare with FLS' turnkey costs and services.

FEATURES

- **Flexibility** decks and staircases can be added into the stand configurations as needed to alter and expand access to the aircraft
- **Portability** modules are also easily assembled/disassembled and palletized for efficient transport and deployment
- **Efficiency** quick release pins provide tool-free attachment points for easy setup and expansion
- **Mobility** flexible modules can be repositioned anywhere along the aircraft

MULTIPLE CONFIGURATION OPTIONS
